DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 12/26/02 was filed after the mailing date of the First Office Action on 9/17/02. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or (2) a patent granted on an application for patent by another filed in the United States before the
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- 1. Claims 1-15 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Gallaway et al. (6,354,962). With respect to claims 1-6, 8, and 10-15, Callaway discloses an iron golf club (Col. 8, lines 44-47) with coefficient of restitution 0.8 to 0.93 under standard USGA test conditions. The striking plate 72 with a thickness of 0.1-0.25 inch (Col. 2, lines 58-60)

Art Unit: 3711

having a surface area 5.5 square inch (Col. 3, lines 32-35) with a height dimension of 48 mm (Col. 8, lines 65-68). The hollow interior 46 of the club head 42 is coupled with the striking plate and it is obvious that such configuration allows the face to be freely deformed upon ball impact. With respect to claim 7, Gallaway discloses the titanium face, which is one of the materials of the claim invention; thus it appears that Gallaway's invention has the elasticity of the claimed invention. With respect to claim 9, Official Notice is taken that it is conventional to fabricate the club head with sole portion thicker or heavier and it would have been obvious to do so here to improve the moment of inertia and/or to lower the center of gravity.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Publication number 08-168541 (JPN 08-168541). JPN 541' discloses an iron golf club with high strength material face plate having a thickness less than 3 mm and face bending resistance 120 kgf/mm2 with the cavity in the sole portion thicker than the top edge part. Although JPN 541' does not discloses expressly the COR values but it appears JPN 541' invention shows the same concept of fabricating a club head with high elasticity in the striking face and reduced energy loss or more energy is transferred

Application/Control Number: 09/833,319

Art Unit: 3711

to the ball upon ball impact. Consequently, the flight distance is improved. Thus, it is inherent and obvious that JPN 541' has such coefficient of restitution. With respect to the dimension of the striking face, USGA has no restriction on the dimensional limits of the striking face; thus, golf club manufactures can fabricate the striking face with any size just as long as the club head does not exceed 350 cc.

Response to Arguments

Applicant's arguments with respect to claims1-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tom P Duong whose telephone number is (703) 305-4559. The examiner can normally be reached on 8:00AM - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Sewell can be reached on (703) 308-2126. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7768 for regular communications and (703) 305-3579 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-4148.
